

Plex Media Server - iGPU Mounting

/dev/dri mounted through container for iGPU usage

```
# Optionally specify additional volume mounts for the PMS and init containers.
```

```
extraVolumeMounts:
```

```
- name: dev-dri
```

```
  mountPath: /dev/dri
```

```
# extraVolumeMounts:
```

```
# - name: some-volume-name
```

```
#   mountPath: /path/in/container
```

```
# Optionally specify additional volumes for the pod.
```

```
extraVolumes:
```

```
- name: dev-dri
```

```
  hostPath:
```

```
    path: /dev/dri
```

```
# extraVolumes:
```

```
# - name: some-volume-name
```

```
#   emptyDir: {}
```
